DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 10, drawn to compounds of the formula shown in claim 1, classified in class 546, subclass 79+.
- II. Claims 11 to 14, drawn to compounds of the formula shown in claim 11, classified in class 546, subclass 61+.
- III. Claims 15 to 20, drawn to compounds of the formula shown in claim 15, classified in class 544, subclass 99+.
- IV. Claim 21, drawn to compounds of the formula shown in claim 21, classified in classes 544 and 546, various subclasses.
- V. Claims 22 to 39, drawn to compounds of the formula shown in claim 22, classified in class 546, subclass 33+.
- VI. Claims 40 to 48, drawn to a method of staining a biological sample, classified in class 436, subclass 172+.

The inventions are distinct, each from the other because of the following reasons:

The compounds of groups I to V are independent and distinct from one another because of their structural differences. The compounds contain a different number of fused rings.

Inventions V and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the compounds of group V can be used to dye textile materials.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one of the groups is not required for the other groups, restriction for examination purposes as indicated is proper. In addition, a search of all of the claims would impose a serious burden on the examiner and

Art Unit: 1626

the patent office resources since separate patent, literature and computer searches would have to be done.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fiona T. Powers whose telephone number is 703-308-4535. The examiner can normally be reached on Monday - Friday 8:30 AM to 5:00 PM.
